

Small but mighty. The StreetPilot i2, i3
and i5 give you state-of-the-art car

Small wonder in car navigation.

navigation in a unit that's about the size
of a baseball. The i-series offers everything
you'd want from a car nav system including
automatic routing, crystal clear voice
guidance, address lookup and an extensive
database of points of interest. You also
get a simple operating system that
amounts to rolling a wheel and clicking to
enter. Choose from the i2 with
monochrome screen, its colorful
counterpart the i3, or the i5 with
preloaded detailed maps throughout
North America. If it's low cost, simple
operation and compact size you want in a
car navigation system, the "i's" have it.

Moving map features

Detail: StreetPilot® i5 comes preloaded with MapSource® City Navigator™ North America NT street-level maps and addresses for all of the U.S., Canada and Puerto Rico. StreetPilot® i2 and i3 come with DVDs for loading MapSource® City Select® North America NT street-level mapping detail
